

OUR STAFF

The employees of Casper Elevator Cleaning study NAEC standards and receive intense hands-on training for job safety, codes, rules and regulations, and violations. We ensure that our entire roster of employee's (from recent hires to veterans) are kept up to date. Our staff is always professional, respectful and dedicated individuals who take pride in their work and excel in their craft.

After extended periods of time of not doing simple cleaning, this can cause major safety issues. Now the work environment is unstable, dirty, and unsafe, leaving it vulnerable for breakdowns, fires, personal injury to anyone, and most of all, an easy way to fail an inspection and even get major violations because of it. Some companies can't afford to have their helpers or mechanics take time here and there to do these full clean outs because its valuable time being wasted where they may be needed for emergencies elsewhere.

Most elevator companies just don't have the time to do what we do. We are NOT an elevator maintenance or service company. Our goal is to satisfy the building owners/ management, and to carry out the request of the elevator company who called us in to do the job. We are in that building for a reason; to maintain your elevator equipment appearance.

Our mission is to offer our services by bringing safety to the definition. We are to carry out an excellent job in a professional manor, and passion behind the work.
